Mostly likely we can participate but what are the details? How many samples etc...

Thanks,
Jason

Subject: RE: Legionella and Mycobacterium QPCR ?

Hi Jason,

I am revising this question of a validation round-robin for Legionella and Mycobacterium QPCR assays. Would EMSL be potentially interested in being a part of this? EPA is thinking of using the ABI Step One platform. I understand the samples would need to go to the lab in NJ.

Thanks.

Steve

Subject: Legionella and Mycobacterium QPCR ?

Hi Jason,

EPA is considering a validation round-robin for Legionella and Mycobacterium QPCR assays. It would be about 24 samples with 3 or 4 assays for each organisms.

Does the EMSL lab in Cincinnati do any QPCR analyses?

Thanks.

Steve

Steve, Happy new year. Do you have a copy of this article that you can send me electronically?

Visually observed mold and moldy odor versus quantitatively measured microbial exposure in homes

Sounds like it was a good one. I am doing an endotoxin and mold talk this year at IAQA that I can reference your article.
Cheers,
Jason

Thanks Steve, I actually read this one a few weeks ago as I prepared a presentation. I gave an ERMI talk up in Maine a couple weeks ago. It was a good one. Good to see there is a lot of active research going on. The SERMI was another interesting one in Singapore.

Appreciate you forwarding these to make sure I have the latest info,
Jason
